

Product Data Sheet

STB16 & STB24:

The Rob Pond adjustable stud bracket is a complete, easy adjustable and quick solution for mounting electrical boxes, conduit and pipework between studs in drywall applications.

The bracket offers a simple, yet effective designed flange that allows you to measure & align quickly along.

Quicker and easier to install than traditional methods.

Can be set at multiple depths.

A lightweight product made from high quality galvanised steel.

Can be fixed to wood or metal joists.
